SUMMARY

Passionate backend engineer focused on writing **clean, efficient, and scalable code** that powers real-world, user-centric products. Experienced in building robust APIs and **optimizing code for performance, readability, and maintainability**. Known for contributing effectively to product-driven teams and thriving in fast-paced environments that value ownership, code quality, and continuous learning.

SKILLS

- **C++**
- **OOPS**
- **DSA**
- **Java**
- HLD
- **LLD**
- **Go Lang**
- **MYSQL**
- **DBMS**
- Operating Systems
- REST API
- Problem Solving
- CI/CD
- **Jenkins**
- MongoDb
- Computer Networks
- AWS
- **Spingboot**
- **NoSQL**
- **Azure**

EXPERIENCE

Amadeus Software Labs Pvt Ltd. **July 2023 – Present**
Software Development Engineer-1 *Bangalore, India*

- Enhancing the functionality of the hotel industry's **central reservation system** through feature development in **C++ backend**, aimed at elevating customer experience.
- Developed features in **C++ backend** technology for airlines, focusing on **campaigns and promo codes** creation to boost ancillary revenue and enhance travel comfort options.
- Proficiently **debugged code** to investigate and resolve customer issues within **2 hrs** in **production and testing environments** across airline and hotel industry projects, ensuring seamless functionality and customer satisfaction.
- Followed **agile methodologies** within Scrum team to prioritize tasks based on both team capacity and user needs.
- Played a dual role as **Scrum Master** and **C++ Developer** for 6 months, effectively managing sprint tasks, removing blockers and facilitating team communication.

Amadeus Software Labs Pvt Ltd. **February 2023 – June 2023**
Software Development Engineer – Internship *Bangalore, India*

- Developed a software application using **Java fundamentals** to automate the generation of performance testing reports, reducing manual effort by **2 hrs**.
- Implemented **automation scripts leveraging Playwright** for web interactions, ensuring robust and efficient testing capabilities.
- Integrated **Jackson for efficient JSON parsing** and data serialization, enhancing data handling capabilities within the application.
- Utilized **Mockito for unit testing** to validate the functionality of critical components, achieving the reliability of software.
- Successfully delivered a fully functional software solution that is now utilized by performance testers, improving report generation process.

Personal Project

- Developed **Student Management System** using **Go Lang**
- Implemented **CRUD** operations and integrated **dbSqlite** for seamless **data maintenance**.

EDUCATION

B.E. Computer science and Business Systems **2019 – 2023**
Thapar Institute of Engineering and Technology *Patiala, India*

EDUCATION

B.E. Computer science and Business Systems **2019 – 2023**
Thapar Institute of Engineering and Technology *Patiala, India*
CGPA - 7.80

SKILLS

- Data Structures & Algorithms
- MySQL
- C++
- OOPS
- Java fundamentals
- Python basics
- High level design
- Low level design
